SUMMARY

Machine and Deep Learning Engineer with experience in designing scalable cloud-native data solutions using Python, Scikit-Learn, MLOps, and GitHub Actions. Expertise in building enterprise-grade ETL and CI/CD pipelines, modernizing legacy systems, real-time API integration, and driving business-critical analytics solutions. Strong collaborator with cross-functional teams, product managers, and business stakeholders, with proven experience in leading end-to-end data platform initiatives across wide domains.

PROFESSIONAL EXPERIENCE

Founder & Lead Developer — *Sikkim PSC Preparation Hub* Mar 2026 – Present | Sikkim, India

- **Platform Architecture:** Developed and deployed a comprehensive open-source web platform serving civil service aspirants, structuring a scalable user dashboard and managing hosting infrastructure.
- **Data Engineering:** Curated, structured, and integrated a massive database containing over 5,000 AI-generated educational notes and multiple-choice questions (MCQs).
- **System Deployment:** Architected a reliable system leveraging standard frontend structures coupled with a cloud database for low-latency delivery and real-time state persistence.

Tech Stack: HTML, CSS, JavaScript, Firebase, Git

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS, PowerShell

AI & Machine Learning: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, TensorFlow

Frameworks & Web: React.js, Electron, FastAPI, Streamlit, Custom UI/UX Design, Unicorn

Databases: SQL Server, MongoDB

Practices: Data Cleaning, EDA, Feature Engineering, Model Training, Containerization (Docker), ETL Pipelines, MLOps

KEY PROJECTS

Macroweaver - An AI Economic Policy Advisor

[GitHub Link](#)

- **Project Overview:** Built an intelligent economic policy advisor that leverages language models to simulate and analyze macro-economic strategies.
- **Backend Architecture:** Deployed high-performance asynchronous API endpoints using FastAPI to interface with local and cloud-hosted Llama models.
- **User Interface:** Developed a responsive and dynamic React user interface for a seamless data visualization experience.

Tech Stack: FastAPI, Llama Models, React, Python

Stellar Civil - Structural and Load Calculations

[GitHub Link](#)

- **Project Overview:** Engineered a high-performance structural design platform that bridges the gap between manual IS code derivations and opaque proprietary software.
- **Engineering Standards:** Implemented built-in compliance checks for Indian Standard (IS) codes, including IS 456 (Concrete), IS 800 (Steel), and IS 875 (Design Loads).
- **Technical Architecture:** Built using Vite 6.x and modular Vanilla JavaScript for real-time structural modeling and instantaneous feedback on design iterations.

Teesta Basin Risk Analysis - GIS-based Climate Project

[GitHub Link](#)

- **Project Overview:** Engineered a mapping tool to evaluate flood-prone zones, climate trends, and hydropower infrastructure exposure in the Teesta River basin.

- **Data Visualization:** Built an interactive Streamlit web application translating complex geospatial and climate risk datasets into actionable visual models.

Tech Stack: Python, Streamlit, GIS Mapping, Data Analysis Tools, React.js

CERTIFICATIONS

- **Udemy:** "100 Days of Code": The Complete Python Pro Bootcamp
- **Udemy:** Complete Data Science, Machine Learning, DL, NLP Bootcamp
- **Anthropic:** Model Context Protocol: Advanced Topics

EDUCATION

Sikkim Manipal Institute of Technology

Bachelor of Technology in Civil Engineering

Graduated: May 2024 | Sikkim, India

- **GPA:** 7.90/10
- **Achievements:** Avid Designer at the Design Club of SMIT
